Dendera temple

The Temple of Hathor was largely constructed during the Late Ptolemaic period, specifically during the reign of Ptolemy XII and Cleopatra VII. Later additions were made during the Roman period. Although built by a dynasty of rulers who were not native Egyptians themselves, the design of this temple has been found to be in accordance with that of other classical Egyptian temples, with the exception of the front of the hypostyle hall, which, according to an inscription above the entrance, was constructed by Emperor Tiberius.

Apart from these, there are also scenes in the temple complex portraying the Ptolemaic rulers. For example, carved onto the external face of one of the temple walls is a huge relief of Cleopatra VII and her son by Julius Caesar and co-ruler, Ptolemy XV (better known as Caesarion). The two Ptolemaic rulers are shown dressed in Egyptian garb, and offering sacrifices.

Hathor was also regarded as a goddess of healing, and this is evident in the presence of a sanatorium in the temple complex. Here, pilgrims would come to be cured by the goddess. Sacred water (which was made holy by having it poured onto statues inscribed with sacred texts) was used for bathing, unguents were dispensed by the priests of Hathor, and sleeping quarters were provided for those hoping that the goddess would appear in their dreams, and so aid them.

Aswan High Dam is a rock-fill dam located at the northern border between Egypt and Sudan. The dam is fed by the River Nile and the reservoir forms Lake Nasser. Construction for the project began in 1960 and was completed in 1968. It was officially inaugurated in 1971.

[The Unfinished Obelisk](#)

Aswan was the source of ancient Egypt's finest granite, used to make statues and embellish temples, pyramids, and obelisks. The

large unfinished obelisk in the Northern Quarries has provided valuable insight into how these monuments were created, although the full construction process is still not entirely clear. Three sides of the shaft, nearly 42m long, were completed except for the inscriptions. At 1168 tonnes, the completed obelisk would have been the single heaviest piece of stone the Egyptians ever fashioned.
