The Pyramids of Cheops :

The Great Pyramid was built as a tomb for the Fourth Dynasty Egyptian pharaoh Khufu and it is estimated that it was built in the 26th century BC around 27 years.

Initially standing at 146.5 metres (481 feet), the Great Pyramid was the tallest man-made structure in the world for more than 3,800 years. Throughout history, the majority of the smooth white limestone casing was removed, which lowered the pyramid's height to the present 138.5 metres. What is seen today is the underlying core structure. The base was measured to be about 230.3 metres (755.6 ft) square, giving a volume of roughly 2.6 million cubic metres (92 million cubic feet), which includes an internal hillock

If you wish to visit the burial chamber of King Cheops. Then we will visit the Pyramid of Chephren or Khafre. This is the second-tallest and second-largest of the 3 Ancient Egyptian Pyramids of Giza and the tomb of the Fourth-Dynasty pharaoh Khafre (Chefren), who ruled c. 2558?2532 BC .Then we will the Pyramid of Mykerinus. Enjoy a Panoramic View of the 3 Pyramids of Giza

We go head to visit the Valley Temple of king Chephren. While doing that you can have a closer look at the Great Sphinx - the legendary guardian that stands by the huge funeral complex with its lion body and the head of king Chephren.

The Grand Egyptian Museum is a monumental, state-of-the-art archaeological museum located on the Giza Plateau, just two kilometers from the Pyramids.It is the largest museum in the world dedicated to a single civilization, Ancient Egypt, and is designed to house over 100,000 artifacts.

Its most famous feature is the first-ever complete display of the entire King Tutankhamun collection—over 5,000 treasures—together for the first time since their discovery.
